

Portable Material Dispensing System

This construction machinery dispenses adhesives, coatings, or sealants. It features a control panel for precise control over pressure and flow rates, and is mounted on wheels for portability.

Overview

Portable Material Dispensing System

This portable material dispensing system is engineered for precise application of adhesives, coatings, and sealants in demanding construction or industrial environments. Featuring a robust vertical frame and a flexible dispensing hose, the unit offers high maneuverability on site while maintaining consistent flow control. Integrated gauges and switches allow operators to monitor and adjust pressure settings with accuracy, ensuring professional-grade results for every application.

Technical Specifications

Control Interface

- Pressure Gauges
- Flow Rate Adjustment Switches
- Integrated Control Panel

System Type	Portable Material Dispensing Unit
Mobility	Wheeled Base, Site-Ready, Portable

Performance

Suitable Materials

Adhesives • Coatings • Sealants

Power Source	Hydraulic/Pneumatic
