

Portable Micro SD Card Speaker with Radio

This portable speaker plays audio from micro SD cards and has a built-in radio. It features a digital display for radio frequency and an integrated speaker.

Product Overview

Compact Audio Solution

The D-120 is a portable micro SD card speaker designed for versatile audio playback on the go. Featuring a built-in radio with a digital display, this device combines convenience and functionality in a compact form factor. It provides a user-friendly interface for playing audio files directly from a micro SD card, making it an ideal choice for portable listening needs.
