

Portable Mid-Rise Scissor Lift for Auto Repair

This portable mid-rise scissor lift is designed for automotive repair and maintenance. It features 14-step safety locks and a powder coating for durability.

Overview

Portable Mid-Rise Scissor Lift

The ECO 5128 is a portable mid-rise scissor lift specifically engineered for automotive repair and maintenance environments. Constructed with heavy-duty steel, it ensures durability and stability during operation, while the hydraulic lifting system provides smooth and reliable performance. Its compact design and adjustable lift arms with protective rubber pads make it an ideal solution for shops needing a versatile lift for cars and light trucks.
