

Portable MIG Welding Machine

This compact MIG welding machine is designed for light to medium-duty applications. It features adjustable voltage and wire feed speed for optimal welding control and is suitable for welding mild steel, stainless steel, and aluminum.

Overview

Versatile Portable MIG Welding Solution

This portable MIG welding machine offers flexible performance with both gas and gasless welding modes, making it suitable for a wide range of working materials. Designed for efficiency and control, it features fan cooling, thermal protection, and adjustable wire feed speed. With 4-step voltage control, operators can achieve precise heat management for various welding applications.

Technical Specifications

Adjustable Controls

- Wire feed speed control
- 4-step voltage control

Voltage Control Steps	4
Cooling System	Fan cooled
Safety Features	Thermal protection, Thermal overload protection

Included Accessories

Package Contents

- Integral MIG Torch
- Earth clamp
- Welding helmet
- Brush and hammer
- Welding cable
- Contact tips
- Carton box

Applications

Welding Modes

Gas • Gasless

Compatible Materials	Mild Steel, Stainless Steel, Aluminum
