

Portable MIG/MAG Welding Machine

This compact and portable MIG/MAG welding machine is designed for light to medium-duty applications. It features adjustable welding parameters and an integrated wire feed mechanism for smooth, consistent wire delivery.

Product Overview

Versatile Portable Welding Solution

This portable MIG/MAG welding machine is designed for efficiency and ease of use in light to medium-duty welding tasks. Featuring a fan-cooled system and stepless wire feed, it offers consistent performance for various fabrication projects. The unit supports both gas-shielded and gasless flux-cored welding, making it a flexible tool for automotive repairs and general DIY fabrication.

Technical Specifications

Cooling System

Fan-cooled

Power Supply Type

Single-phase, Alternating Current (AC)

Safety Protection

Thermostatic Protection, Thermal Overload Protection

Wire Feed Control

Stepless

Welding Capabilities

Supported Welding Modes

- MIG/MAG (Gas-shielded)
- Flux-cored (Gasless)

Included Accessories

Standard Accessories

- MIG torch
- Earth clamp
- Welding cable
- Brush/Hammer
- Protective mask
- Carton box
