

Portable MMA Welding Machine with Digital Display

This MMA welding machine is a portable and efficient welding solution. The DC inverter series welder features a digital current meter for precise adjustments and offers a current control knob with min/max settings.

Overview

Portable MMA Inverter Welder

The M18 series inverter welding machine offers a portable and efficient solution for Manual Metal Arc (MMA) welding tasks. Designed for both professional and DIY applications, this DC inverter welder features a digital current meter for precise adjustments. Its intuitive interface includes a simple current control knob with clear min/max settings, ensuring reliable performance across various welding projects.

Technical Specifications

Welding Process	MMA (Manual Metal Arc)
Series	M18

Key Features

Performance Metrics

160 A
Rated Current

Suitable For

Professional Use • DIY Projects

Interface Capabilities	Digital Current Meter, DC Inverter Technology, Min/Max Current Control
