

Portable Navigation Device with Map Display

This portable device displays detailed maps for navigation. It is designed for location tracking and route planning in industrial settings.

Product Overview

Professional Navigation Solution

This portable navigation device is engineered for reliable route planning and location tracking in demanding environments. Featuring a high-clarity touchscreen interface and a durable, rectangular form factor, it offers intuitive operation for mobile professionals. The integrated kickstand design ensures versatile positioning, making it an ideal tool for field operations requiring consistent map access.

Physical Characteristics

Form Factor	Rectangular
Interface	Touchscreen
Mounting Options	Kickstand, Portable, Handheld
