Product Overview

Compact On-Site Oxygen Solution

The C series oxygen generator is a highly compact, stand-alone system designed for small-scale health care facilities and commercial applications. Engineered for plug-and-run functionality, it offers exceptional performance, stability, and versatility for low flow rate requirements. This system serves as a reliable and cost-effective alternative to traditional oxygen cylinders and liquid supply methods.

Technical Features

Main Application Fields

- Medical facilities
- Laboratory settings
- Aquaculture
- Industrial processes

Core Technologies

PSA Technology, Plug and Run, Compact Design, Automated Controls
