Product Overview

High-Efficiency Ozone Disinfection

The MTS-001 series is a professional-grade ozone generator designed for rigorous air purification in industrial and clinical environments. It effectively eliminates bacteria, viruses, and toxic odors through advanced oxidation processes, leaving no secondary pollution behind. Its portable stainless steel construction ensures durability and ease of movement between workshops, medical facilities, and cold storage areas.

Performance Metrics

Core Performance

10 g/h

Ozone Output

100 W

Rated Power

100 m³

Max Space Coverage

Technical Specifications

Ozone Concentration	10mg-22mg
Cooling System	Wind cold
Enclosure Material	201 Inox. steel

Electrical Requirements

Power Input	220V/50Hz
-------------	-----------

Physical Dimensions

Unit Dimensions	350 x 200 x 200 mm
Gross Weight	9 kg

Compliance and Features

Included Accessories

- Power cord
- Warranty card
- Instruction manual

Suitable Applications

Food Workshop, Medical/Health, Breeding, Cold Storage, Purification Workshop
