

Portable Personal Air Conditioner with Casters

This portable air conditioner is designed for personal or small space cooling. It features a front-facing vent, a top control panel, a water reservoir, and casters for mobility.

Product Overview

Compact Cooling Solution

This portable air conditioner is specifically engineered for personal use and efficient cooling in smaller spaces. Its streamlined, compact design includes an integrated water reservoir for moisture management and a top-mounted control panel for intuitive operation. Equipped with smooth-rolling casters, the unit offers maximum mobility, allowing users to move it effortlessly between rooms.
