

Portable Personal Juicer

This portable juicer is designed for on-the-go use. It features stainless steel blades for efficient blending and a convenient carrying loop.

Overview

Portable Personal Juicer

This portable personal juicer is designed for quick and convenient extraction of fruit and vegetable juices. Its compact, lightweight construction makes it an ideal solution for home use or on-the-go lifestyles. Featuring durable materials and efficient stainless steel blades, it simplifies the process of creating fresh smoothies, protein shakes, and juices daily.

Design & Build

Key Design Elements

- Compact and portable form factor
- Durable construction
- Clear blending chamber
- Integrated carrying loop

Blade Material	Stainless steel
----------------	-----------------

Usage

Ideal Applications	Smoothies, Protein Shakes, Fruit Juices, Vegetable Juices
--------------------	---

History

Origin of the Juicer

The concept of the juicer was pioneered by Dr. Norman Walker in 1930. Since that time, designers have evolved the technology, creating various models and mechanical principles to optimize the extraction process for modern users.
