

Portable Physical Property Meter

This is a portable meter used for measuring physical properties. It features a digital display and probe, suitable for quick and accurate readings in diverse applications.

Overview

Portable Physical Property Meter

This portable meter is designed for rapid and accurate measurement of physical properties, specifically optimized for pH analysis. Featuring an integrated digital display and a durable probe, it offers a user-friendly interface for field or laboratory testing. The inclusion of Automatic Temperature Compensation (ATC) ensures reliable readings across varying environmental conditions.
