

Portable Power Station with Multiple Outputs

This portable multi-function energy storage bag utilizes a lithium-ion battery and provides USB, TYPE-C, DC, AC, and car cigarette lighter outputs. Covering a wide voltage range, it powers small to medium digital devices, home appliances, and emergency vehicle equipment.

Overview

Versatile Energy Storage Solution

This portable multi-function energy storage system utilizes advanced lithium-ion battery technology to provide reliable power wherever you need it. Designed for both indoor and outdoor use, it supports a wide range of devices including digital electronics, household appliances, and emergency tools. With flexible charging options, including solar and vehicle input, this station ensures you stay powered during travel, power outages, or off-grid operations.

Technical Specifications

Charging Methods

- Solar Energy
- Vehicle Charging
- Commercial Power (Mains)

Available Output Interfaces

USB, TYPE-C, DC, AC, Car Cigarette Lighter

Features

Supported Applications

- Digital devices (phones, tablets, cameras, computers)
- Home appliances (lighting, fans, TVs, electric blankets)
- Professional equipment (drones, power tools, robots)
- Automotive emergency (jump starting, air pumps, vacuums)

Built-in LED Lighting

10 W

Max Power

5 W

Min Power

Lighting Modes

Standard Lighting • SOS Signal • Flashing

Safety & Design

Design Highlights

- Compact and durable construction
- Digital display for real-time monitoring
- Portable, user-friendly design

Safety Protections

Overcharge Protection, Overheat Protection, Short Circuit Protection
