

Portable Pressure Lantern with Blue Shade

The Pressure Lantern is a portable lighting device designed for outdoor use. It features a pressurized fuel system, durable metal construction, and adjustable brightness.

Overview

Professional Grade Portable Illumination

The Portable Pressure Lantern is a robust, high-performance lighting solution engineered for reliability in demanding outdoor environments. Featuring a classic pressurized fuel system and durable metal construction, it provides consistent illumination for camping, emergency preparedness, and remote site operations. Its integrated blue enamel shade efficiently directs light downwards, while the adjustable control valve allows users to customize brightness levels for extended operation.

Technical Specifications

Lighting Features

- Pressurized fuel system
- Adjustable brightness control
- Protective glass globe
- Downward light deflection

Construction Material	Polished Metal with Blue Enamel
Suitability	Camping, Emergency Lighting, Outdoor Operations

Design Components

Key Components

Component	Description
Fuel Tank	Pressurized storage unit
Pump Mechanism	Manual pressure buildup
Control Valve	Red knob for adjustable brightness
Burner Assembly	Core illumination source
