

Portable PTC Space Heater

This portable heater uses a PTC (Positive Temperature Coefficient) heating element for efficient space heating. It automatically adjusts power to maintain a consistent temperature, ensuring safe operation.

Product Overview

Efficient Portable Heating Solution

This portable PTC space heater is designed for versatile use in homes, offices, and workshops. It utilizes advanced Positive Temperature Coefficient (PTC) heating elements to provide safe and efficient heat output with automatic temperature regulation. The unit features a durable cylindrical metal housing and an accessible control panel for a user-friendly experience.

Performance

Heat Settings	3
Thermostat Type	Adjustable
