Product Overview

Smart Solar Lighting Solution

This portable solar-powered lantern provides an eco-friendly and reliable lighting source for outdoor adventures and emergency preparedness. Featuring integrated microprocessor control, it intelligently manages charging and discharging to maximize battery life while offering convenient mobile device charging capabilities. With its rugged construction and lightweight design, it is an ideal companion for camping, hiking, and remote power requirements.

Technical Specifications

Key Features

- Microprocessor-based intelligent power management
- Automatic solar charging recognition
- Low battery status alert
- Over-current and over-charge protection
- Ultra-low power standby mode

Model Number	CS-SCL-08
--------------	-----------

USB Output Current	500 mA
--------------------	--------

Functionality

Primary Functions	Solar Charging, LED Lighting, Mobile Device Charging, Power Bank Function
-------------------	---

Safety & Protection

Protection Systems

Over-charge Protection • Over-discharge Protection • Over-current Protection • Low Voltage Cut-off
