Product Overview

Smart Solar Lighting Solution

This portable solar-powered LED lantern is engineered for reliable outdoor illumination and emergency backup power. Featuring advanced 12-bit AD processing, it offers intelligent charge management to maximize battery life and prevent flicker. With versatile lighting modes and a built-in USB power bank, it serves as an essential tool for camping, hiking, and emergency preparedness.

Technical Specifications

Operating Modes

- High brightness output
- Low brightness output
- USB 5V output

USB Output Current	500 mA
External Solar Input	5W / 9V
Certifications	CE, RoHS

Smart Features

Smart Features

- Low battery voltage alert
- Automatic charging/lighting detection
- Over-charge and over-discharge protection
- Over-current protection for USB

Status Indicators

Status	Indicator Light
Charging	Red light flashes
Fully charged	Green light flashes
Low voltage	Warning light flashes quickly
