

# Portable Solar LED Lantern with USB Charging

This portable solar LED lantern features a 3W solar panel and a 4400mAh Li-ion battery. It offers USB and 5.5V DC output for charging devices and provides easy-to-use, sustainable lighting.

## ADDITIONAL IMAGES

## Product Overview

### Sustainable Portable Lighting

The CESC-8003A Portable Solar LED Lantern is a versatile and eco-friendly lighting solution designed for off-grid use. It provides energy-efficient illumination for indoor or outdoor environments and doubles as a power hub for mobile devices. Compact and lightweight, this kit is an ideal choice for camping, hiking, and emergency power requirements.

## Technical Specifications

Model	CESC-8003A
Solar Panel Power	3 W
Solar Panel Technology	Mono/Poly Crystalline
Cable Length	6 m

## Features and Compliance

### Product Advantages

- Simple and convenient use
- Energy saving
- Environment friendly
- Low-cost design
- Mobile phone charging capability

### Certifications

CE, ISO 9001, UKAS, RoHS, SGS

## Applications

### Primary Applications

Camping • Hiking • Emergency Lighting • Off-grid Power • Indoor/Outdoor Lighting
