

Portable Solar Panel Charger

This portable solar panel charger features a solar cell array in a silver-colored frame. It is designed for portable power generation, suitable for charging small electronic devices using solar energy.

Overview

Portable Solar Energy Solution

The MRD205 is a compact and efficient solar panel charger designed for reliable power generation in outdoor environments. Featuring a sleek, modern design with a durable silver-colored frame, it utilizes a high-performance photovoltaic cell array to maximize sunlight absorption. This portable unit is an ideal solution for keeping small electronic devices powered while off-grid or in areas with ample sunlight.

Technical Specifications

Model Number	MRD205
Design Features	Portable, Compact, Outdoor Ready
Construction	Silver-colored frame with parallel photovoltaic cell rows
