

Portable Solar Powered Lantern with USB Charging

This solar lantern features a solar panel for charging and a hook for hanging. It includes multiple charging adapters for various devices, providing versatile power solutions in off-grid situations.

Product Overview

Versatile Off-Grid Lighting Solution

The MRD411 portable solar lantern provides a reliable light source and power station designed for areas without stable electricity access. Featuring an integrated solar panel for sustainable recharging, this unit is ideal for emergency preparedness, camping, and remote field work. With its multi-device output ports and compact hanging design, it offers a practical and flexible energy solution for various off-grid environments.
