

Portable Solar Powered LED Flood Light

This portable flood light features a high-intensity LED panel for bright illumination. It is powered by a solar panel and includes an AC adapter and car charger for versatile charging.

Overview

High-Efficiency Solar Flood Lighting

The FSTG003C portable LED flood light is designed for versatile outdoor use, featuring a high-efficiency polysilicon solar panel for sustainable operation. With a durable die-casting aluminum shell and IP67 waterproof rating, it is built to withstand harsh weather conditions including thunderstorms. Its dual-head design provides high brightness, while the smart battery management system ensures reliable performance for up to 12 hours of continuous illumination.

Performance & Battery

Charging Time

5 hours

Charging Time

Continuous Runtime	12 hours
Rainy Day Autonomy	2-3 days

Design & Construction

Ingress Protection

IP67 • Anti-thunder • Waterproof

Material	Die-casting aluminum
Lighting Configuration	Dual-head

Smart Features

Smart Features

- Smart quick charge
- Automatic brightness adjustment
- Battery level indicator
- Charging status indicator
