

Portable Solar-Powered LED Torch

This portable torch provides reliable LED illumination for camping and outdoor use. It features a solar panel for charging and a rotary switch to adjust the light intensity.

Product Overview

Sustainable Portable Illumination

This portable solar-powered LED torch is designed for reliable, eco-friendly lighting in diverse environments. Featuring integrated solar charging capabilities, it eliminates the need for external power sources, making it an ideal tool for field operations or emergency preparedness. The ergonomic top handle and intuitive base-mounted rotary brightness control ensure ease of use for professional applications.

Technical Specifications

Power Source	Solar Powered, Rechargeable
Brightness Control	Rotary switch at base

Design and Build

Material Composition

- Red durable plastic housing
- Clear diffused lighting lens

Portability	Yes
Handle Style	Integrated top handle
