

Portable Spotting Telescope for Outdoor Observation

This telescope is designed for observing outdoor scenery, animals, and astronomical events. It features variable magnification and precision optics for clear, bright images.

Overview

Professional Outdoor Observation

This portable spotting telescope is engineered for high-precision observation of distant subjects. Featuring variable magnification capabilities and advanced optical systems, it delivers bright, clear imagery essential for detailed viewing. Its rugged, weather-resistant build ensures reliable performance in diverse outdoor environments, making it an excellent tool for bird watching, nature study, and long-range surveillance.

Optical Performance

Magnification

- 18x
- 24x

Optical Quality

Precision Optics • High-Clarity
