

Portable Steam Car Washer

This portable steam car washer utilizes steam thermal degradation to gently remove dirt. It is suitable for cleaning car engines, dashboards, air conditioning and other parts.

Overview

Illustrated technical breakdown of the steam cleaning process using thermal degradation and pressure.

Professional Portable Steam Cleaning

This portable steam cleaning machine utilizes advanced thermal degradation principles to effectively soften, expand, and separate dirt from vehicle surfaces. Designed for versatility, it allows for simultaneous cleaning and drying, ensuring a fast and professional finish while protecting delicate paintwork. The unit is compact, lightweight, and features high-pressure steam capabilities, making it an ideal solution for comprehensive automotive detailing, including engines, dashboards, and air conditioning vents.

Technical Specifications

Model Specifications

Feature	CW-ES03	CW-ES04
Steam Consumption (L/H)	10	14
Steam Pressure (Bar)	5-10	6-10
Heating Power (KW)	3	4

Performance Metrics

165 °C Max Steam Temp	10 L Tank Capacity	22 KG Machine Weight
---------------------------------	------------------------------	--------------------------------

Features

Standard accessories set including steam hose, inlet hose, spray gun, and specialized brushes.

Key Operational Features

- Instantaneous steam production in approximately 60 seconds
- Continuous 24-hour operation capability
- Stainless steel body construction
- Dry and wet steam free adjustment
- Water and electricity separation for safety
- Manual and automatic water supply modes

Safety Protections

Water protection, Leakage protection, Over-temperature protection, Over-voltage protection, Winter antifreeze

Application

Professional steam cleaning performance for interior upholstery and sanitization.

Application Areas

Home cleaning, Property management, Schools, Hospitals, Automotive detailing
