

Portable Temperature Calibration Kit

This is a portable thermometer kit. The kit contains various temperature measuring instruments, sensors, and related accessories for precise temperature monitoring and calibration.

Product Overview

Precision Calibration Solution

This portable temperature calibration kit is designed for professional field use and precision monitoring. It provides a comprehensive set of instruments and sensors required for accurate temperature calibration tasks. Housed in a durable metallic carrying case, the kit ensures all tools are protected and organized for seamless transport between job sites.

Technical Specifications

Components

- Temperature measuring instruments
- Precision sensors
- Calibration accessories

Design Type

Portable • Field-Ready

Housing

Metallic carrying case
