

Portable Thermoelectric Mini Fridge

The portable thermoelectric mini fridge is a compact cooling and warming device. It is suitable for cars, offices, and travel, and can hold several cans or small containers.

Product Overview

Compact Temperature Control

The portable thermoelectric mini fridge offers a versatile solution for cooling and warming items on the go. Designed for maximum mobility, it is ideal for office spaces, dorms, vehicles, or travel use. With its dual-power functionality and quiet operation, it ensures your beverages, snacks, or sensitive skincare products are kept at the perfect temperature anywhere.
