

# Portable Travel Refrigerator

This portable refrigerator is designed for both cooling and freezing food and beverages. It features a durable design with a digital display and operates on both AC and DC power for versatile use during travel, camping, and other outdoor activities.

## Product Overview

### Portable Travel Refrigerator

This portable refrigerator is designed for travel, camping, and outdoor activities, featuring a DC frequency conversion compressor for low-noise, rapid cooling. It offers versatile temperature control ranging from 10°C down to -18°C, allowing for both refrigeration and freezing capabilities. Built with a high-density PU insulation layer and low-voltage battery protection, it ensures both efficient performance and safety for your vehicle's power system.

## Performance & Cooling

### Temperature Range

**10 °C**

Max Temperature

**-18 °C**

Min Temperature

### Operating Modes

Refrigeration • Freezing

### Cooling Technology

DC Frequency Conversion, Low Noise, Fast Refrigeration

## Design & Features

### Convenience Features

- Integrated wheels for easy transport
- LED control panel
- LED interior tank lamp
- Cover with guide rail support
- High-density PU thermal insulation

## Safety & Power

### Battery Protection

Yes
