Product Overview

Portable Ultrasonic Humidifier

This compact ultrasonic humidifier is designed for efficient, localized air moisture control in small personal spaces. Featuring a versatile, bottle-compatible design, it is highly portable and easy to maintain. With advanced ultrasonic technology and automatic safety features, it provides a reliable solution for improving air quality in offices, bedrooms, or while traveling.

Technical Specifications

Rated Power	12 W
Rated Voltage	100-240V
Rated Frequency	50-60Hz
Product Dimensions	127 x 65 x 109 mm

Performance Metrics

Key Performance Metrics

80 ml/h Max Mist Output	6 m3 Max Coverage Space	35 dB Noise Level
Atomization Frequency	1.7 MHz	

Features & Design

Key Features

- Lightweight and practical design
- Wide voltage input for global compatibility
- Universal bottle compatibility (no dedicated tank required)
- Automatic protection during water shortage
- Glass glaze coating for scale resistance

Safety Features

Auto-Shutoff • Water Shortage Protection • Scale Resistant Coating
