Overview

Portable UV-C Sanitizing Solution

This portable UV-C LED sanitizing lamp is designed for efficient disinfection of surfaces and small personal objects. Featuring a compact, retractable design, it emits ultraviolet light at a 254 nm wavelength to effectively eliminate bacteria, viruses, and other pathogens. It is a convenient, rechargeable tool intended for maintaining hygiene on the go.

Technical Specifications

Physical Dimensions

State	Length	Unit
Extended	141	mm
Closed	98	mm

UV-C Wavelength	254 nm
Diameter	37.5 mm

Features

Primary Applications

- Surface disinfection
- Small object sanitization
- Personal hygiene maintenance

Power Source	Rechargeable via USB
Design Features	Portable, Retractable, Hexagonal Design, Lipstick-style
