Product Overview

Effective Surface Sterilization

This portable UV light sanitizer wand is engineered for professional and personal surface disinfection. Utilizing UVC ultraviolet quartz lamp technology, it provides high-intensity radiation to neutralize contaminants on various surfaces. The dual power supply options ensure flexibility and ease of use in any environment.

Technical Specifications

Radiation Intensity

2500 uw/cm2
Intensity

UV Wavelength	253.7 nm
Rated Power	3 W
UV Lamp Size	4mm x 100mm

Operational Features

Power Supply Modes

- 4x AAA batteries (not included)
- 5V USB input (power bank compatible)

Control Interface

Power Touch Switch • Working Indication Light

Compliance	CE, FCC
Working Temperature Range	-10 to 45°C
