Product Overview

Portable UV-C Sterilization Solution

This portable UV light sanitizer wand provides an efficient way to disinfect various surfaces and personal objects in home, office, or travel environments. Utilizing high-performance UVC ultraviolet quartz technology, the device effectively neutralizes microorganisms through a focused 253.7nm wavelength. Designed for ease of use, it features a touch-sensitive power switch and flexible power options including USB connectivity and battery operation.

Technical Specifications

UV Wavelength	253.7nm
Radiation Intensity	2500 uw/cm2
Rated Power	3 W
Working Temperature	-10 to 45

Power and Usability

Power Supply Options

- 4 x AAA batteries (not included)
- 5V USB input (power bank compatible)

Switch Type	Power Touch Switch
