

# Portable Water Dental Flosser with Electric Toothbrush

This portable device combines water flossing and electric toothbrush functionality. It is designed for efficient and thorough dental cleaning with multiple cleaning modes and a compact design.

## ADDITIONAL IMAGES

## Product Overview

### Comprehensive Oral Care Solution

This portable dental care device integrates a water flosser and an electric toothbrush into a single, compact unit designed for on-the-go hygiene. It provides 360-degree cleaning capabilities to effectively reach all areas of the mouth. The system is engineered to eliminate oral bacteria and decompose organic matter without leaving chemical residues, ensuring a safe and thorough cleaning experience.

## Technical Features

### Safety Features

No chemical residues • Safe for daily use

### Cleaning Modes
