

# Portable Water Pump for Irrigation and Drainage

This portable water pump is designed for irrigation and drainage. It features a robust engine, durable pump housing, and a discharge hose with a nozzle for controlled water flow.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Portable Water Pump

This portable water pump is engineered for efficient irrigation, cleaning, and emergency drainage operations. Featuring a powerful gasoline engine and a floating design, it offers exceptional mobility and convenience for agricultural or field use. The stainless iron impeller ensures long-term reliability, while the adjustable nozzle allows for precise flow control in diverse working conditions.

## Technical Specifications

Impeller Material	Stainless iron
Engine Type	Gasoline

## Operational Features

### Applications

- Irrigation
- Cleaning
- Fire fighting
- Drainage

### Key Features

Floating Design, Adjustable Nozzle, Lightweight, Portable

## Commercial Terms

### Warranty

**3 Years**

Warranty Duration

### Payment Options

- 30% T/T deposit, 70% T/T against B/L copy
- Irrevocable L/C at sight

### Standard Lead Time

Within 35 days upon deposit or L/C

### Nearest Shipping Port

Qingdao Port
