

Portable Water Pump for Irrigation

This compact water pump is designed for drainage and irrigation. It features a durable housing and efficient motor for reliable performance.

Product Overview

Professional Portable Water Pump

This portable water pump is engineered for reliable performance in both agricultural and domestic drainage and irrigation applications. Its compact design ensures ease of transport and installation across various field settings. Featuring a durable housing and an efficient motor, this unit is built to withstand consistent use while maintaining high operational standards.

Technical Specifications

Design & Construction

- Compact portable chassis
- Durable protective housing
- High-efficiency electric motor

Primary Applications

Agricultural Irrigation, Domestic Drainage, Water Transfer
