

Portable Welding Machine with Adjustable Settings

This compact welding machine is designed for a range of welding tasks. It features adjustable settings and is equipped with a handle and wheels for easy transport.

Product Overview

Professional Portability

This portable welding machine is engineered for versatility and ease of use across various welding applications. Featuring a robust design with integrated handles and wheels, it provides excellent maneuverability for professional and DIY tasks. It is optimized for 220V power inputs, ensuring consistent performance for a wide range of welding requirements.

Technical Specifications

Adjustable Current Range

180 A

Max Rated Current

Input Voltage	220V
Frequency	50 Hz

Design and Ergonomics

Interface

- Manual adjustment +/- controls
- Power ON/OFF switch
- Clear voltage and current indicators

Portability	Integrated Handle, Wheeled Base, Compact Design
