

Post-Bed Lockstitch Sewing Machine for Leather

The AG series post-bed lockstitch sewing machines are designed for sewing heavy leather materials. These machines are suitable for combined sewing operations and corner stitching on items like bags and shoes.

Product Overview

Professional Post-Bed Lockstitch Series

These post-bed lockstitch machines are precision-engineered for heavy-duty leather applications, including footwear, handbags, and luggage. Featuring advanced column-type sewing tables and roller presser feet, they offer exceptional maneuverability for complex corner stitching and combined operations. The series includes specialized models with heightened post-beds specifically designed for sewing large-scale items like equestrian boots and expansive leather goods.
