

Post Bed Sewing Machine for Shoe and Garment Manufacturing

This heavy-duty post bed sewing machine is designed for demanding applications in garment, shoe, and accessory manufacturing. It features a robust construction for durability and stability during operation.

Overview

Heavy-Duty Post Bed Sewing Machine

This robust post bed sewing machine is engineered for demanding applications within the garment, shoe, and accessory manufacturing industries. Its high post bed design is specifically configured to accommodate bulky or three-dimensional items, ensuring consistent seam quality and precise stitching. Built for stability and durability, this machine provides versatile performance across a wide range of materials, including leather, canvas, synthetics, and textiles.

Technical Capabilities

Primary Applications

- Binding
- Piping
- Decorative stitching

Compatible Materials

Leather, Canvas, Synthetics, Textiles

Performance Features

Control Features

Adjustable Stitch Length • Adjustable Sewing Speed

Design Highlights

- High post bed configuration for 3D items
- Robust construction for enhanced stability
- Heavy-duty durability
