

Pot Mould for Ceramic and Metal Forming

This precision-engineered pot mould is designed for creating consistent and high-quality ceramic or metal pots. It features a multi-part construction for easy demolding and durable materials for long-lasting performance.

Product Overview

Precision Moulding Solution

This precision-engineered pot mould is designed to create consistent, high-quality ceramic and metal pots. Featuring a multi-part construction, it allows for easy demolding while maintaining durable performance for long-term use. Its smooth internal surfaces ensure optimal pot formation, making it an ideal choice for achieving precise dimensions and intricate designs in both pottery and metalworking applications.

Technical Specifications

Design Features

- Multi-part construction
- Easy demolding mechanism
- Durable material composition
- Smooth internal surface finish

Target Audience

Professional Artisans • Hobbyists

Suitable Applications

Ceramic Forming, Metal Forming, Pottery, Metalworking
