

Pot Mould Holder for Secure Mold Clamping

This pot mould holder is designed for secure and reliable mold clamping. It is constructed from high-strength metal alloy for durability and longevity.

Product Overview

Precision Mold Clamping Solution

This pot mould holder is engineered to provide secure and reliable mold clamping for industrial pot production. Constructed from high-strength metal alloy, it ensures long-term durability and consistent performance. The split-clamp design facilitates efficient mold installation and removal, helping to streamline your manufacturing workflow.

Technical Specifications

Material	High-strength metal alloy
Design Features	Split-clamp design, High-strength, Precision-engineered
Application Compatibility	Suitable for a variety of pot mould sizes and configurations

Performance

Clamping Performance

1 High

Clamping Consistency
