

Poultry Hair Removal Machine

This machine efficiently removes hair from poultry such as chickens, ducks, and geese. It is suitable for use in poultry processing plants and farms.

Overview

Efficient Poultry Processing

This poultry hair removal machine is specifically engineered for the efficient processing of chicken, duck, and goose. Designed for reliability in farm and processing environments, it streamlines the feather removal process to save time and labor. Its robust construction ensures consistent performance for small to medium-scale operations.

Technical Specifications

Power Output

1.5 kW

Power

Model	JS-50
Voltage & Frequency	220V 50Hz
Motor Speed	1400 rpm

Physical Dimensions

Weight	55 kg
Dimensions (L x W x H)	630 x 630 x 980 mm

Usage

Compatible Poultry Types	Chicken, Duck, Goose
