Overview

Professional Powder Actuated Fastening Tool

This high-performance powder actuated tool is designed for heavy-duty fastening applications into concrete and steel. Engineered with a built-in silencer for noise reduction, it delivers a powerful 450 J impact, capable of driving fasteners through 10mm steel or high-grade concrete (C30 to C60). With a 20-year proven track record, this tool offers reliable performance and full interchangeability with standard industry parts.

Technical Specifications

Maximum Impact Energy

450 J

Impact Power

380 Nm

Max Energy (Black Cartridge)

Weight Options

- 3.2 kg
- 3.4 kg

Compatible Cartridges

Black, Red, Yellow, Green, White

Powder Load Caliber

.27 Caliber (6.8x11mm)

Compatibility & Accessories

Supported Fasteners

Fastener Category	Description
Pins	NK drive pins, TB eyelet pins
Threaded Studs	M6, M8, M10
Pin Length	16mm to 72mm

Available Equipment Sets

8mm Equipment • 10mm Equipment • 12mm Equipment • Grating Equipment • Long Equipment

Features

Key Features

- Integrated silencer for low noise operation
- Adjustable power regulation
- Interchangeable parts with standard industry models
- Capable of penetrating 10mm steel
- Suitable for C30-C60 high-grade concrete
