

Powder Actuated Tool Fastener

This specialized fastener is designed for use in powder-actuated tools. It features a threaded shank for secure anchoring, a pointed tip for penetration, and a collar for a tight seal.

Product Overview

High-Performance Fastening Solution

This specialized fastener is engineered specifically for use in powder-actuated tools, providing reliable anchoring in demanding environments. Designed with a threaded shank and a sharpened tip, it ensures efficient penetration and secure attachment to hard substrates like concrete and steel. The integrated collar provides a tight seal, enhancing stability and preventing loosening over time.

Technical Specifications

Design Features

- Threaded shank for secure anchoring
- Pointed tip for optimized penetration
- Integrated collar for tight seal
- Color-coded for load identification

Load Identification

Red Color-Coded

Compatible Surfaces

Concrete, Steel, Hard Surfaces
