Product Overview

Industrial Vacuum Conveying Solution

This advanced vacuum conveyor is designed for the efficient, hygienic transfer of powder and granular materials in demanding production environments. By automating the feeding process directly into mixers, it significantly reduces manual labor and prevents costly material outflow. Engineered with high-grade materials and compliance in mind, it is the ideal choice for pharmaceutical and foodstuff processing lines requiring consistent, sanitary performance.

Technical Specifications

Core System Components

- Oil-free and water-free vacuum pump
- Feeding tube
- PE filter
- Vacuum hopper
- Automatic control device
- Pneumatic discharging device
- Compressed air device

Material Construction

SUS304 Stainless Steel

Compliance and Usage

Industry Applications

Pharmaceutical • Foodstuff Processing • Chemical Industry

Certifications

GMP Certified

Performance Features

Key Performance Features

- Low power consumption
- High conveying capacity
- Low operating noise
- Extended service life
- High mobility with integrated casters
