Overview

Industrial Power Distribution Solution

This power distribution switchgear cabinet is designed for reliable electrical management in industrial and commercial environments. It features a robust, enclosed metal structure that houses measuring instruments, protective appliances, and auxiliary equipment. The system supports both manual and automatic circuit control, offering essential protection against faults while providing real-time parameter monitoring.

Technical Specifications

Rated Current Capacity

4000 A

Primary Switch

2000 A

Secondary Switch

Protection Features

- Circuit breaking on fault
- Abnormal operation alarm
- Overload protection

Operational Modes

Manual Control, Automatic Control

Design & Construction

Monitoring Capabilities

Digital Displays • Indicator Lights • Parameter Adjustment

Connectivity Components

- Terminal blocks
- Color-coded wiring
- Multiple outlets

Enclosure Type

Closed or semi-enclosed metal cabinet
