

Power Generator Alternator

This alternator is designed for diesel generating sets ranging from 8kW to 800kW, available in both silent and open types. It is engineered for efficient power generation.

Overview

High-Performance Power Generation

This versatile range of alternators and diesel generating sets is designed for reliable power output across various industrial and commercial applications. The lineup includes both brush and brushless configurations, offering flexibility for different technical requirements and environments. With power capacities ranging from 8kw to 1000kw, these units provide stable performance in both open and silent type configurations.

Technical Specifications

Power Output Range

8 kW Minimum Power	1000 kW Maximum Power
------------------------------	---------------------------------

Alternator Technologies

- STC Series (Brush type)
- TFW2 Series (Brushless type)
- YHG Series (Brushless type)

Diesel Genset Capacity

8kw to 800kw

Configuration Options

Generating Set Configurations

Silent Type • Open Type
