

Power Harrow for Soil Preparation

This power harrow is designed for efficient soil preparation and cultivation. It features a robust rotor with multiple blades for breaking up soil clods and creating a fine seedbed.

ADDITIONAL IMAGES

Overview

Professional Soil Preparation Solution

This power harrow is designed for efficient land cultivation and seedbed preparation, capable of breaking up soil without damaging its structure. It features a robust gearbox and thickened spline shafts for enhanced durability under demanding conditions. With its multi-purpose design, it is ideal for primary tillage, stubble control, and preparing optimal seedbeds for various economic crops.

Technical Specifications

Compatible Tractor Power

50 HP

Minimum HP

280 HP

Maximum HP

Model Specifications

Parameter	Value
Working Width	2.5 m
Working Depth	25 cm
Number of Rotors	10
Weight	1200 kg
Blade Type	Spiral

Working Width Range

1.25m - 4.7m

Key Features

Operational Highlights

- Deep soil breaking without structure damage
- Even soil distribution, avoiding large clods
- Integrated flat soil plate and roller for compaction
- Elastic tooth overload clutch for protection
- Quick-change cutter head system

Durability & Construction

Strengthened Gearbox, Thickened Spline Shafts, Super Large Type Bearings, Heavy-duty Rotor Construction
