

Power Sprayer for Agricultural and Industrial Use

This power sprayer is a robust machinery component designed for various spraying applications. It features durable construction with a red-painted body and brass components, ensuring longevity and reliability.

Overview

Robust Power Sprayer

The FT-18C Power Sprayer is a robust and efficient machinery component designed for versatile spraying applications. Built for longevity, it features a durable red-painted body with high-quality brass components. The unit is designed for stability and precise control, making it an ideal choice for demanding agricultural, industrial, and cleaning tasks.

Performance

Key Performance Metrics

1 Gauge Included

Pressure Monitoring

Construction

Build Materials

Brass Components, Durable Painted Body

Base Design

Sturdy black base for stability

Applications

Recommended Applications

- Agricultural Spraying
- Industrial Applications
- Cleaning Tasks
