

Power Tool Battery Charger

This charger is designed for power tool batteries and is compatible with standard 120V power outlets. An LED indicator panel displays the charging status, including power on, charging, charged, and battery fault.

Product Overview

Efficient Charging Solution

The EC130 Quick Charger is a robust and efficient charging unit specifically engineered for power tool batteries. It features a clear LED indicator panel for real-time status updates, including power, charging, and fault alerts. Designed for standard 120V outlets, this charger is built with durable housing to ensure reliability and minimize downtime for your professional tools.

Technical Specifications

Input Voltage	120 V
Model Number	EC130

Features

Indicator Panel Statuses

- Power On
- Charging
- Charged
- Battery Fault

Key Highlights

Quick Charging • Durable Housing • LED Indicators • 120V Compatible
