

Power Tool Carbon Brush

Carbon brushes are essential components for transferring electrical current to the motor armature in power tools, ensuring efficient operation. These brushes feature a durable carbon composition for extended lifespan and reliable performance.

Product Overview

High-Performance Carbon Brushes

These carbon brushes are essential components designed for transferring electrical current to the motor armature, ensuring efficient operation in various power tools. Engineered with durable carbon composition, they provide an extended lifespan and reliable performance. Each unit comes equipped with a spring and connector for easy installation and secure contact, making them ideal for replacing worn or damaged brushes.

Technical Specifications

Model Compatibility	Automotive Starter, Alternator, Power Tools
Available Moulds	500 types

Packaging & Logistics

Packaging Options

Type	Configuration
Box Packing	1 set/bag, 5 pcs/box, 250 sets/carton
Blister Card	1 set/bag, 10 sets/big bag
Bag Packing	1 set/bag

Master Carton Dimensions	41 x 36 x 23 cm
