

Pre-Insulated Pin Terminals for Electrical Connections

These pre-insulated pin terminals are designed for secure and reliable electrical connections. The tubular pin design ensures optimal contact, while the pre-insulated sleeve enhances safety.

Product Overview

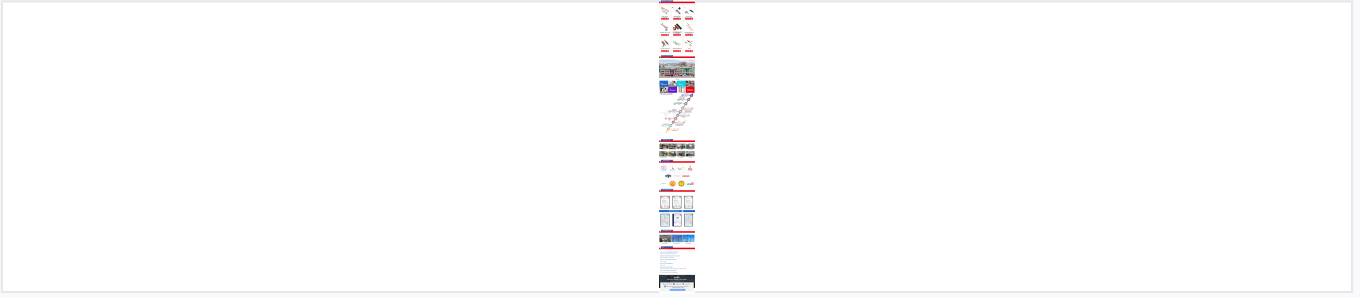

Professional Electrical Connectivity

The PTV series pre-insulated pin terminals provide a robust solution for wire and cable connectivity in power transmission and distribution systems. Designed with a specialized tubular pin contact, these connectors ensure optimal conductivity and mechanical stability within terminal blocks. Each terminal comes pre-insulated to enhance operator safety and simplify the installation process in various electrical environments.

Terminal Category	PTV Type Electrical Tube Pin
Compliance and Standards	CE, ISO, UL

Technical Features

Key Design Features

- Tubular pin contact for high conductivity
- Pre-insulated sleeve for electrical safety
- Engineered for power transmission and distribution
- Designed for reliable long-term performance

Service and Support
